# LUCIA specifications

- ◇ Energy domain : 0.8 - 8 keV:  
     K edges from Na to Co; L and M edges above Ni
- ◇ micro- beam aspect :  $\mu$  (XRF – XAS)  
     spot size  $\rightarrow$   $2.5 \times 2.5 \mu\text{m}^2$
- ◇ High density of photons  $10^{11}$ ph/sec:
- ◇ Linear (0-90°) and circular polarization:

Heterogeneous or small samples  
 Diluted samples  
 Oriented samples
